

Curriculum Vitae

Jesús Devesa Múgica, DNI: 35 9444826 N, MD, Ph.D.

Professor of Human Physiology

December 2, 2020

SURNAME: DEVESA MÚGICA

NAME: JESÚS

SEX: M

ID: 35944826N **DATE OF BIRTH:** 03/19/1946.

University ID: AC44EC3083 CU

PARTICULAR ADDRESS: CHALET "AS GAIVOTAS". Guldrís 44.

TOWN: TEO. **POSTAL CODE:** 15886

PHONE: +34 655299686

ACADEMIC FORMATION

MEDICAL DOCTOR. CENTER: SCHOOL OF MEDICINE SANTIAGO DE COMPOSTELA

DATE: JULY. 30. 1970

PhD: SCHOOL OF MEDICINE SANTIAGO DE COMPOSTELA, JULY 13, 1973.

QUALIFICATION: OUTSTANDING CUM LAUDE

PROFESSIONAL CAREER

UNIVERSITY OF SANTIAGO DE COMPOSTELA

SCHOOL OF MEDICINE

DEPARTMENT: PHYSIOLOGY

PROFESSOR OF PHYSIOLOGY: 1973-2012

Professor Ad Honorem. 2012- 2015.

SCIENTIFIC DIRECTOR OF THE MEDICAL CENTER FOLTRA AND FOUNDATION

FOLTRA. ADDRESS: Travesía de Montouto 24. TEO. ESPAÑA. PHONE: +34

981802928. HOMEPAGE: <http://www.foltra.org>

Specialist in Endocrinology

Qualified Deputy for Advanced Manufacturing of Medicinal Products

PROFESSIONAL ACTIVITIES AND POSITIONS

DATES	POSITION	ORGANISM
1964-1970	Intern alumn,	Dpt. of Physiology. University of Santiago
1970-74	Associated Professor,	Dpt. of Physiology University of Santiago
1973-74	Special Prof. of Physiology and Biochemistry	University of Granada
1974-1993	Special Prof. of Physiology and Biochemistry	University of Santiago
1993-2012	Professor of Physiology	University of Santiago
1975-2012	Head of the Lab of Special Biochemistry	University Hospital
1975-	Supervisor of Radioactive Instalations	Center of Nuclear Energy Madrid
2012-2015	Profesor "Ad Honorem"	University of Santiago
2012-	Scientific Director	Foundation and Medical Center Foltra

2015-2016 International Master in Advanced Manufacturing of Medicinal Products

Languages

SPANISH, ENGLISH, FRENCH, SPANISH, PORTUGUESE, ITALIAN

FINANCED RESEARCH PROJECTS: 28.

PUBLICATIONS (Articles)

La determinación seriada del Antígeno Carcinoembriogénico como elemento de control de recidivas postoperatorias en procesos tumorales de la mama y aparato digestivo

A. Mato; M. de Sas; C. Fernández-Feijóo; C. Fernández; **J. Devesa. Revista Quirúrgica Española, 6: 285-287. 1979.**

Niveles de IgA, D, E, G, y M en niños y adolescentes de Galicia.

R. Tojo; JM. Pérez Gallego; **J. Devesa**; M. Castro; JM. Fraga; R. Cabanas; I. Pérez.
Revista Española de Pediatría, 35: 383-394. 1979.

Efecto de la bromocriptina sobre la secreción de tirotropina y hormona de crecimiento.

M. Pombo; L. Feliu; MJ. Martínez Sapiña; MD. Martínez; F. Alvez; JL. Iglesias Diz; **J. Devesa**;
M. Bravo; J. Pereira; R. Tojo.
Anales Españoles de Pediatría, 13:497-502, 1980.

Función endocrina después del tratamiento radioterápico craneal de neoplasias en la infancia.

J.M. Couselo; M.L. Fernández Bujía; M. Pombo; **J. Devesa**; R. Tojo; J. Peña.
Anales Españoles de Pediatría, 995-1010, 1982.

Metabolic and Hormonal Parameters after Insulin-Induced Hypoglycemia in Man. Comparison between Biosynthetic Human Insulin and Purified Pork Insulin.

R. Pérez-Fernández; F. Casanueva; **J. Devesa**; J. Cabezas.
Hormone and Metabolic Research, 17: 350-353, 1985.

Glucocorticoid deficiency with Achalasia of the cardia and lack of lacrimation.

M. Pombo; **J. Devesa**; A. Taborda; M. Iglesias; F. García-Moreno; G.J. Gaudiero; JM. Martínón;
M. Castro-Gago; J. Peña.
Clinical Endocrinology, 23: 237-243, 1985.

Effect of an isolated pulse of hpGRF-40 Sm-C and PRL serum concentration in GH-deficient infants.

M. Pombo; A. Taborda; R. Pérez-Fernández; JL. Rodríguez Sánchez; L. Bokser; J. Peña; **J. Devesa.**
Revista Argentina de Endocrinología y Metabolismo, 23: 41-48, 1986.

Pro-Gamma-MSH y Sistema Nervioso Vegetativo: un nuevo concepto de la regulación del trofismo
córtico- adrenal.

J. Devesa.

Medicina Galaica, 35: 19-24, 1986.

Atropine selectively blocks GH-RH induced GH secretion without altering LH, FSH, TSH, PRL and
ACTH/Cortisol secretion elicited by their specific hypothalamic releasing factors.

F. Casanueva; L. Villanueva; Y. Diaz; **J. Devesa;** A. Fernández-Cruz; AV. Schally.

Clinical Endocrinology, 25: 319-323, 1986.

Previous beta-adrenergic blockade (BAB) increases GH response to GRF-29 in short normal (SN) but not in
GH-Deficient (IGH-D) children.

M. Pobo; A. Taborda; L. Lima; MF. Bustillo; **J. Devesa.**

Pediatric Research 20: 1190. 1986.

Dopaminergic modulation of the development of adrenal zona reticularis in pre-adrenarchal rabbits.

J. Devesa; R. Pérez-Fernández; GJ. Gaudiero; MO. Toma; L. Lima; F. Facchinetti;
A. Genazzani.

Journal of Pediatric Endocrinology, 2:47, 1987.

Adrenal Cortex and Type II Polycystic Ovary Syndrome.

J. Devesa; R. Pérez-Fernández; L. Lima; J. Cabezas.

Gynecological Endocrinology, 3:25-29, 1987.

Steroids and Neuroendocrine function in Anorexia Nervosa.

F. Casanueva; CG. Borrás; B. Burguera; C. Muruais; M. Fernández; **J. Devesa.**

Journal of Steroid Biochemistry, 27: 635-640, 1987.

Morphological and functional stimulation of adrenal reticularis zone by dopaminergic blockade in dogs.

R. Pérez-Fernández; F. Facchinetti; A. Beiras; L. Lima; GJ. Gaudiero; A. Genazzani;

J. Devesa.

Journal of Steroid Biochemistry, 28: 465-470, 1987.

Growth Hormone and Prolactin secretion after Growth Hormone-Releasing Hormone administration, in
Anorexia Nervosa patients, Normal controls and Tamoxifen-pretreated volunteers.

F. Casanueva; CG. Borrás; B. Burguera; L. Lima; C. Muruais; JAF. Tresguerres; **J. Devesa.**

Clinical Endocrinology, 27: 517-523, 1987.

Pruebas diagnósticas en el déficit de secreción de Hormona de Crecimiento.

L. Lima; MJ. Lechuga; N. Lois; C. Fraga; C. Lema; J. Zalvide; **J. Devesa.**

Galicia Clínica. 3: 34-39, 1987.

Dopamine acts on acetylation of proopiomelanocortin-derived products in dog pituitary.

F. Facchinetti; R. Pérez-Fernández; MO. Toma; GJ. Gaudiero; MJ. Lechuga; **J. Devesa**;
A. Genazzani.

Acta Endocrinologica (Copenhagen) 117: 33-38, 1988.

Hypothalamic-somatotroph rhythm (HSR and GH response to GRF-29 in short normal (SN) and GH-deficient children (GH-D)

Pombo M, García-Leis R, Ortigueira R, Lima L, **Devesa J.**

Pediatric Research 23: 121, 1988.

Adrenal androgen secretion and dopaminergic activity in Anorexia Nervosa.

J. Devesa; R. Pérez-Fernández; L. Bokser; GJ. Gaudiero; L. Lima; F. Casanueva.

Hormone and Metabolic Research. 20: 57-60, 1988.

Presence of pro-opiomelanocortin-related peptides in dog adrenal gland.

F. Facchinetti; R. Pérez-Fernández; D. Radi; A. Genazzani; **J. Devesa.**

Medical Science Research, 16: 829-831, 1988.

Inhibitory effect of cabergoline on the development of estrogen-induced pituitary prolactin secreting adenomas.

A. Dall' Ara; L. Lima; D. Cocchi; E. Di Salle; E. Cancio; **J. Devesa**; E. E. Müller.

European Journal of Pharmacology, 151: 97-102, 1988.

Hypothalamic-somatotroph Rhythm (HSR) and GH response to GRF-29 in short normal (SN) and GH-Deficient children (GH-D)

M. Pombo; A. García-Leis, R. Ortigueira; L. Lima; **J. Devesa.**

Pediatric Research, 23, 121. 1988.

Neuroendocrine alterations induced by cranial irradiation(CR) in children with acute lymphoblastic leukemia (LLA).

M. Pombo; M.L. Couce; J.M. Couselo; **J. Devesa.**

Pediatric Research, 24: 526. 1988.

Depending on the time of administration, Dexamethasone potentiates or blocks Growth Hormone-Releasing Hormone-Induced Growth Hormone release in man.

F. Casanueva; B. Burguera; M.A. Tomé; L. Lima; JAF. Tresguerres; **J. Devesa**; C. Diéguez.

Neuroendocrinology, 47: 46-49, 1988.

Análisis de las alteraciones neuroendocrinas inducidas por radiación cráneo-espinal en niños con leucemia linfoblástica aguda y méduloblastoma.

M.L. Couce; J.M. Couselo; M. Pombo; **J. Devesa.**

Anales Españoles de Pediatría, 30: 85-90, 1989.

Growth hormone (GH) responsiveness to GHRH in normal adults is not affected by short- term gonadal blockade.

L. Lima; V. Arce; N. Lois; C. Fraga; M.J. Lechuga; J.A.F. Tresguerres; **J. Devesa.**

Acta Endocrinologica (Copenh), 120: 31-36, 1989.

Reasons for the variability in GH responses to GRH challenge: The endogenous hypothalamic-somatotrophic rhythm.

J. Devesa; L. Lima; N. Lois; C. Fraga; MJ. Lechuga; V. Arce; JAF. Tresguerres.

Clinical Endocrinology, 30: 367-377, 1989.

Effects of bromocriptine on the pituitary and the adrenal cortex of immature rabbits.

R. Pérez-Fernández; F. Facchinetti; T. García Caballero; A. Genazzani; **J. Devesa.**

Journal of Endocrinological Investigation, 12: 221-227, 1989.

Study of the source(s) of hyperandrogenism in women with Idiopathic Hirsutism.

V. Leite; **J. Devesa;** L. Valdés; L.G. Sobrinho.

Hormone and Metabolic Research, 22: 499-503, 1990.

Disfunción neuroendocrina tras radioterapia.

M. Pombo; M.L. Couce; J.M. Couselo; **J. Devesa.**

Anales Españoles de Pediatría, 32: 1-3, 1990.

New concepts in the neuroregulation of Growth Hormone (GH) secretion.

L. Lima; V. Arce; M.J. Díaz; N. Lois; J.A.F. Tresguerres; **J. Devesa.**

Arquivos de Medicina de la Facultad de Medicina de Porto 3: 329-338, 1990.

Control de GH por GHRH y SS: Situación actual.

J.A.F. Tresguerres; B. Moreno; **J. Devesa.**

Revista Clínica Española, 187: 420-428, 1990.

Alpha-2-adrenergic agonism enhances the Growth Hormone (GH) response to Growth Hormone-Releasing Hormone (GHRH) through an inhibition of hypothalamic somatostatin release in normal men.

J. Devesa; V. Arce; N. Lois; J.A.F. Tresguerres; L. Lima.

Journal of Clinical Endocrinology and Metabolism, 71: 1581-1588, 1990.

Synergistic effect of growth hormone (GH)-releasing hormone (GHRH) and clonidine in stimulating GH release in young and old dogs.

V. Arce; S.G. Cella; S. Loche; E. Ghigo; **J. Devesa;** E.E. Müller.

Brain Research, 537: 359-362, 1990.

Role of central dopaminergic pathways in the GH control in normal men: Studies with metoclopramide.

V. Arce; L. Lima; N. Lois; A. Rodríguez; M.J. Díaz; J.A.F. Tresguerres; **J. Devesa**.
Neuroendocrinology, 53: 143-149, 1991.

Neurorregulación de la secreción de hormona de crecimiento (GH) y expresión del gen de esta hormona en pro- y eucariotas.

J. Devesa; M.J. Díaz; A. Odriozola; V. Arce; L. Lima.
Endocrinología, 38: 33-41, 1991.

The role of sexual steroids in the modulation of Growth Hormone secretion in humans.

J. Devesa; N. Lois; V. Arce; M.J. Díaz; L. Lima; J.A.F. Tresguerres.
Journal of Steroid Biochemistry and Molecular Biology, 40: 165-173, 1991.

Evidence that alpha-2-adrenergic pathways play the major role in Growth Hormone (GH) neuroregulation: alpha-2-adrenergic agonism counteracts the inhibitory effect of muscarinic cholinergic receptor blockade on the GH response to GH-releasing hormone, while β -adrenergic blockade diminishes the potentiating effect of increased cholinergic tone on such stimulation in normal men.

J. Devesa; M.J. Díaz; J.A.F. Tresguerres; V. Arce; L. Lima.
Journal of Clinical Endocrinology and Metabolism, 73: 251-256, 1991.

Clonidine pretreatment modifies the Growth Hormone secretory pattern induced by short- term continuous GRF infusion in normal men.

L. Lima; V. Arce; M.J. Díaz; J.A.F. Tresguerres; **J. Devesa**.
Clinical Endocrinology, 35: 129-135, 1991.

Growth Hormone and Aging

V. Arce; L. Lima; **J. Devesa**.
Endocrinología, 38: 254-268, 1991.

Neuroendocrine control of Growth Hormone secretion in humans.

J. Devesa; L. Lima; JAF Tresguerres.
Trends in Endocrinology and Metabolism, 3: 173-181, 1992.

Consecuencias sobre el crecimiento de la radioterapia cráneo-espinal.

M. Pombo; M.L. Couce; **J. Devesa**; J.M. Couselo.
An. Esp. Pediatr. 37: 4-7, 1992.

The exposure to LH in women with idiopathic hirsutism correlates with their ovarian contribution to the androgen pool.

V. Leite; L.G. Sobrinho; **J. Devesa**; M.J. Morales; J.M. Boavida; M.A. Santos.
Endocrinología, 39: 177-180, 1992.

Glucocorticoids may inhibit growth hormone release by enhancing β -adrenergic responsiveness in hypothalamic somatostatin neurons.

L. Lima; V. Arce; M.J. Díaz; J.A.F. Tresguerres; **J. Devesa.**

Journal of Clinical Endocrinology and Metabolism, 76: 439-444, 1993.

A 12-kilodalton (12-K) N-glycosylated growth hormone-related peptide is present in human pituitary extracts.

M.J. Díaz; F. Domínguez; L.S. Haro; N. Ling; **J. Devesa.**

Journal of Clinical Endocrinology and Metabolism, 77: 134-138, 1993.

Clonidine potentiates the growth hormone (GH) response to GH-releasing hormone in norepinephrine synthesis-inhibited rats: Evidence for an α_2 -adrenergic control of hypothalamic release of somatostatin.

L. Lima; V. Arce; JAF. Tresguerres; **J. Devesa.**

Neuroendocrinology, 57: 1155-1160, 1993.

Studies on α_2 -adrenergic modulation of hypothalamic somatostatin secretion in rats.

L. Lima; V. Arce; JAF. Tresguerres; **J. Devesa.**

Life Sciences, 53: 665-668, 1993.

Clonidine potentiates the GH response to a GHRH challenge in hypothalamic GHRH-deficient rats.

V. Arce; M. García Barros; E. Vara; L. Lima; J.A.F. Tresguerres; **J. Devesa.**

Neuroendocrinology, 61: 552-558, 1995.

Regulation of hypothalamic somatostatin by glucocorticoids.

J. Devesa; M. García Barros; M. Gondar; J.A.F. Tresguerres; V. Arce.

J steroid Biochem Molec Biol, 53: 277-282, 1995

Regulación alfa-2 adrenérgica de la secreción de hormona de crecimiento.

V. Arce; M. García Barros; M. Gondar; J.A. Costoya; **J. Devesa.**

Endocrinología 42: 22-28, 1995.

Expression of the Human Growth Hormone normal gene (hGH-N) in proliferating and differentiated HL-60 cells.

J.A. Costoya; A. Vidal; M. García-Barros; V. Arce; **J. Devesa.**

Experimental Cell Research 228: 164-167; 1996.

Variantes moleculares de hormona de crecimiento humana.

M. García-Barros; V. Arce; **J. Devesa.**

Endocrinología 1996.

Pattern of expression of hGH-V gene in a normal population.

J.A. Costoya; V. Arce; **J. Devesa**.

J Ped Endocr Metab. 11: 591-595, 1998.

Correlation of Pit-1 gene expression and Pit-1 content with proliferation and differentiation in human myeloid leukemic cells.

J.A. Costoya, M. García-Barros, R. Gallego, R. Señarís, V. Arce, **J. Devesa**.

Experimental Cell Research. 245:132-136. 1998.

Activation of Growth Hormone receptor delivers an anti-apoptotic signal: evidence for a role of Akt in this pathway.

J.A. Costoya, J. Finidori, S. Moutoussamy, R. Señarís, **J. Devesa**, V. Arce,

Endocrinology 140: 5937-5943,1999

N-glycosylated variants of growth hormone in human pituitary extracts. Garcia-Barros M, Costoya JA, Rios R, Arce V, **Devesa J**.

Hormone Research. 53:40-5, 2000

Role of growth hormone receptor in HL-60 cell survival.

Costoya JA, Rios R, Garcia-Barros M, Gallego R, Garcia-Caballero T, Señarís R, Arce VM, **Devesa J**.

Mol Cell Biol Res Commun. 4(1):26-31, 2000

Proteolytic processing of human growth hormone (GH) by rat tissues in vitro: influence of sex and age.

Garcia-Barros M, **Devesa J**, Arce VM.

J Endocrinol Invest. 23(11):748-54. 2000

Myostatin regulates cell survival during C2C12 myogenesis. Rios R, Carneiro I, Arce VM, **Devesa J**.

Biochem Biophys Res Commun. 19;280(2):561-6. 2001

Somatostatin analog SMS201-995 induces apoptosis of B-chronic lymphocytic leukemia in vitro. Bello JL, Ríos R, Arce, V, **Devesa J**.

BLOOD 2001, 98: 281B.

Activation of human somatostatin receptor 2 promotes apoptosis through a mechanism that is independent from induction of p53.

Teijeiro R, Rios R, Costoya JA, Castro R, Bello JL, **Devesa J**, Arce VM.

Cell Physiol Biochem 12:31-8. 2002

Myostatin is an inhibitor of myogenic differentiation.

Rios R, Carneiro I, Arce VM, **Devesa J**

Am J Physiol Cell Physiol. 282(5):C993-9. 2002

Differential response to exogenous and endogenous myostatin in myoblasts suggests that myostatin acts as an autocrine factor in vivo.

Rios R, Fernandez-Nocelos S, Carneiro I, Arce VM, **Devesa J**.
Endocrinology. 145(6):2795-803. 2004.

Association between vitamin D receptor FokI polymorphism and serum parathyroid hormone level in patients with chronic renal failure.

Vigo Gago E, Cadarso-Suárez C, Pérez-Fernández R, Romero Burgos R, **Devesa Múgica J**, Segura Iglesias C.
J Endocrinol Invest. 28: 117-121. 2005.

La miostatina: un regulador autocrino/paracrino del desarrollo muscular.

VM. Arce, I. Carneiro, S. Fernández-Nocelo, **J. Devesa**.
Endocrinología y Nutrición. 52: 350-357. 2005

Myostatin expression in muscular dystrophies and mitochondrial encephalomyopathies.

Castro-Gago M, Blanco-Barca M, Eiris-Puñal J, Carneiro I, Arce V, **Devesa J**.
Pediatr Neurol. 34(4):281-4. 2006, Reply.

Castro-Gago M, Blanco-Barca O, Eiris-Puñal J, Carneiro I, Arce VM, **Devesa J**.
Pediatr Neurol. 35(4):300. 2006

Muscle myostatin expression in children with muscle diseases.

Castro-Gago M, Gómez-Lado C, Eiris-Puñal J, Carneiro I, Arce VM, **Devesa J**.
J Child Neurol. 22(1): 38-40, 2007

Hypothyroidism is associated with increased expression of myostatin in rats.

Carneiro I, Castro-Piedras I, Muñoz A, Labandeira-García JL, **Devesa J**, Arce VM.
J Endocrinol Invest. 31: 773-78, 2008.

Recovery from neurological sequelae secondary to oncological brain surgery in an adult Growth Hormone-deficient patient after Growth Hormone treatment.

Devesa J, Reimunde P, Devesa A, Souto S, López-Amado M, Devesa P, Arce VM.
J Rehabil Med 41: 775-777, 2009.

Growth Hormone revisited

Devesa J, Devesa P, Reimunde P.
Medicina Clínica (Barc). 13; 135: 655-70. 2010.

Growth hormone deficiency and cerebral palsy

Devesa J, Casteleiro N, Rodicio C, López N, Reimunde P.
Therapeutics and Clinical Risk Management 6: 413-418, 2010.

Effects of recombinant growth hormone replacement and physical rehabilitation in the recovery of gross motor function in children with cerebral palsy.

Reimunde P, Rodicio C, López N, Alonso A, Devesa P, **Devesa J.**
Therapeutics and Clinical Risk Management; 6: 585-592. 2010

Effects of growth hormone (GH) replacement and cognitive rehabilitation in patients with cognitive disorders after traumatic brain injury

Reimunde P, Quintana A, Otero A, Otero-Cepeda JL, **Devesa J.**
Brain Inj; 25: 65-73. 2011.

Growth hormone (GH) treatment may cooperate with locally-produced GH in increasing the proliferative response of hippocampal progenitors to kainate-induced injury.

Devesa P, Reimunde P, Arce V, **Devesa J.**
Brain Inj; 25: 503-10. 2011.

Effects of recombinant growth hormone (GH) replacement and psychomotor and cognitive stimulation in the neurodevelopment of GH-deficient (GHD) children with cerebral palsy: a pilot study.

Devesa J, Alonso A, Casteleiro N, Couto P, Castañón B, Zas E, Reimunde P.
Therapeutics and Clinical Risk Management; 7: 1-8. 2011.

Growth hormone treatment enhances the functional recovery of sciatic nerves after transection and repair.

Devesa P, Gelabert M, Gonzáles-Mosquera T, Gallego R, Relova L, **Devesa J,** Arce V.
Muscle and Nerve. 45: 385-92. 2012.

Growth hormone (GH) and brain trauma.

Devesa J, Reimunde P, Devesa P, Barberá M, Arce V.
Horm Behav. (Special issue: Hormones and neurotrauma). 63: 331-44. 2013.

Myostatin expression is regulated by underfeeding and neonatal programming in rats.

Carneiro I, González T, Lopez M, Señarís R, **Devesa J,** Arce VM
J Physiol Biochem. 69: 15-23. 2013

Early Growth hormone (GH) treatment promotes relevant motor functional improvement after severe frontal cortex lesion in adult rats.

Heredia M, Fuente A, Criado J, Jajeya J, **Devesa J,** Riobobos AS.

May Growth Hormone be useful for regenerative therapies with stem cells?

Devesa J, Devesa P.
Stem Cells Research and Therapeutics. 2018. 3: 98-112.

Cognitive Evolution of a Patient Who Suffered a Subarachnoid Hemorrhage Eight Years Ago, after Being Treated with Growth Hormone, Melatonin and Neurorehabilitation.

Quintana A, Agra C, Outeiral L, Devesa A, Llorente D, **Devesa J**.
Reports-MDPI. 2018. 1: 2-16.

Motor improvement of skilled forelimb use induced by treatment with GH and rehabilitation is dependent on the onset of the treatment after cortical ablation.

Heredia M, Palomero J, de la Fuente A, Criado JM, Yajeya J, **Devesa J**, Devesa P, Rioloobos AS.
Neural Plasticity. 2018:6125901.

Growth Hormone (GH) administration increases the metabolic activity of the left hippocampus in an elder patient with cognitive disorders.

Devesa J, Núñez I, Agra, C, Bejarano A, Devesa P.
Int J Mol Sci. 2018, 19, 290

Rett syndrome: treatment with IGF-1, Melatonin, blackcurrant extracts, and rehabilitation.

Devesa J, Devesa O, Carrillo M, Casteleiro N, Devesa A, Llorente D, González C.
Reports-MDPI. 2018, 1:14-34.

Growth Hormone (GH): multiple therapeutic possibilities and molecular mechanisms of action.

Jesús Devesa.

Guest Editor. **Special Issue International Journal of Molecular Sciences. August 2018.**

Case Reports in Pediatrics.

Jesús Devesa.

Guest Editor. **Special Issue Reports-MDPI August 2018.**

Early treatment with Growth Hormone (GH) and rehabilitation recovers hearing in a child with cerebral palsy.

Guerra J, Devesa A, Llorente D, Mouro R, Alonso A, García-Cancela J, **Devesa J.**

Reports-MDPI 2019, 2, 4.

The role of Growth Hormone (GH) on Ovarian Functioning and Ovarian Angiogenesis.

Devesa J, Caicedo D.

Frontiers in Endocrinology. July 2019. 10: 450.

Hormone therapy: challenges for treating hearing impairments.

Guerra J, **Devesa J.**

SN Comprehensive Clinical Medicine 2019, 1:13.

Evaluación de la reperfusión tras angiogenesis terapéutica con fotopletismografía en un modelo murino de isquemia de miembros inferiores.

Caicedo D, Devesa P, Pazos A, Romero L, Martínez M, Arce VM, **Devesa J.**

Angiología 2019, 71:127-134.

Hydrogen Ion Dynamics of Cancer and a New Molecular, Biochemical and Metabolic Approach to the Etiopathogenesis and Treatment of Brain Malignancies

Harguindey S, Polo Orozco J, Alfarouk K, **Devesa J.**

Int J Mol Sci. 2019, 20, 4278.

Cell proliferation in the brain of rats with cortical motor ablation treated with Growth Hormone and rehabilitation at different times after the injury.

Heredia M, Rodríguez N, Criado JM, de la Fuente JM, **Devesa J**, Devesa P, Riobos A.

Int J Mol Sci. 2019, 20, 5770.

Immortalization of a cell line with neural stem cell (NSC) characteristics derived from mouse embryo.

Almengló C, González T, Seoane M, **Devesa J**, Costoya J, Arce VM.

Dev Dyn. 2020, 249, 112-124.

A New and Integral Approach to the Etiopathogenesis and Treatment of Breast Cancer based upon its Hydrogen Ion Dynamics

Harguindey S, Alfarouk K, Polo Orozco J, Hardonniere K, Stanciu

D, Fais S, **Devesa J.**

Int J Mol Sci. 2020, 21. pii: E1110.

Co-Editor in Chief Reports-MDPI. July 2019

Referee of the Spanish National Agency for the evaluation of scientific and research activity (1999-...).

Referee of the Valencian Agency for the evaluation of scientific and research activity (2011- ...) Referee of the Research Council of Romania (2011...).

Referee of the Argentina National Agency for the evaluation of scientific and research activity (2015...)

Academic Member of the Valencian Agency for the evaluation of scientific and research activity (2017-...)

Referee of the Auckland Research Medical Foundation (2017...)

Referee of the following journals: *Degenerative Neurological and Neuromuscular Disease; Research and Reports in Endocrine Disorders; Stem Cells and Cloning: Advances and Applications; Therapeutics and Clinical Risk Management; Anales Españoles de Pediatría; Neurology; Childs Nervous System; Psychoneuroendocrinology; Archives of Physical Medicine and Rehabilitation; Journal of Pediatric Neurology, European Journal of Endocrinology; Science Domain; British Medical Journal, International Journal of Molecular Sciences, Experimental Eye Research; Endocrine Connections; Journal of Veterinary Science & Animal Husbandry (JVSAH); Biomarkers; General and Comparative Endocrinology; Growth Hormone IGF-I Research. Scientific Reports-Nature; Antioxidants; Frontiers in Endocrinology.*

President of the Galician Society of Endocrinology (1989-1992).

International scientific advisor for Growth Hormone in Serono Inc. (1990-1992).

Awards Received for Research 26.

Other Awards

Gold FAAM Award 2010. Golden scallop Award. 2011.

Award to the Galician Excellence in Research 2011

Award Pharmamel to a Professional Trajectory. University of Granada 2018

Top Doctor 2019, 2020.

Award Medicine 2021 to the Best Center in Neurological Rehabilitation in Spain.

University teachers formed

University Professors: 10

Associate professors of University: 6

Head of Hospitals Departments: 14
